# Re-Imagining the Curriculum

blank slate is an image that represents pure possibility and potential.

That is exactly what our faculty members faced as they examined curriculum changes required by our transition from quarters to semesters. The task of re-imagining Otterbein's curriculum was considerable—but, it was also the kind of challenge academics cherish. It is in our nature to constantly question our work. This calendar conversion provided the impetus to examine what we want to achieve and why it is important.

Each course provided the opportunity to ask questions like: How can I take the essential knowledge of my course and make it more relevant to today's challenges? How can more time with students give our work together greater depth and meaning? How can I re-focus my own passion and knowledge into transformative experiences in the classroom and beyond?

You'll read about some of the innovative ways faculty members and administrators have answered those questions in this issue of *Towers*. I hope you will be as inspired as our incoming students are by their professors' innovation and creativity this fall. I also hope you enjoy a *Towers* introduction to Dr. Victoria McGillin, Otterbein's new provost and vice president for academic affairs.

Finally, I am eager to return to the classroom myself this fall. I look forward to challenging and mentoring my First-Year Seminar class of Miller-Winter scholars, highachieving freshman women named for Otterbein's first two graduates, Sarah Jane Miller and Mary Katherine Winter. This group, soon to be joined by a similarly selected group of highachieving young men, will hear from a wide array of accomplished professionals about the changing expectations of leaders in the 21st century.

Just as men and women stood shoulder to shoulder as faculty and students in 1847 this generation calls on Otterbein to ensure the best and the brightest women and men have the opportunity to lead and serve their professions, their communities, and their nation. Otterbein's long-standing leadership in co-education—we were among the first in the nation to establish a co-educational learning environment from the day we opened our doors—and its commitment to maintaining an inclusive campus further fuels my personal commitment.

As always, I welcome your ideas and involvement. Whether lending your leadership as a guest lecturer in a newly-designed course, mentoring a student, developing an internship, or recruiting a promising new student to join us—Otterbein is as strong and successful as each one of our alumni help us become.

#### Mission Statement

The mission of Otterbein University is to educate the whole person in a context that fosters the development of humane values. Otterbein University is a private, church-related, fouryear coeducational university that sponsors traditional and continuing-education programs of liberal arts and professional education at baccalaureate and master's levels. Our commitment is to the liberal arts as the broad base of all learning

#### Internships in the 70s

Dear Mr. Routson:

I read the Spring 2011 issue of *Towers* "The Experience of a Lifetime" with great interest.

I am glad that on page 25 you included the "Internship Program" of the 1970s, part of which was the Cooperative Education program. From 1975 to 1983, while director of Cooperative Education at Otterbein, I was very pleased to assist several hundred Otterbein students find and/or approve a work experience which was often their first paying job in a field related to their major. I think it reinforced some to continue in that field, while others perhaps changed directions as a result of a real work experience. I was very impressed with the way Otterbein students threw themselves into the work, helping themselves while further enhancing the reputation of Otterbein's connection to the community and its commitment to students. It is a fine institution which helped me no less than the students in the program.

#### **Internship Program Helped Student Teacher**

Something that really helped my educational career was the intern program with Otterbein, Capital, and the Gahanna School system. Instead of student teaching, I was in the intern program at

Gahanna Lincoln Elementary. We interviewed for the position and were assigned to a cooperating teacher for the entire year. I had an excellent experience and got a lot of hands on training which prepared me to be a teacher.

We had many of our classes on site OTTER EFIN TOWERS. FT IS at the school and only had to come to campus for a few. We were paid a small stipend. have seen, The SILE, Colon,

Some of the interns were from Capital and some were from Otterbein. I am still in touch with Ardvantes with erreach my cooperating teacher even Wings bite Line British. though she now lives in South Carolina. She came to visit my classroom a few years ago and it was great to see

her. She enjoyed seeing how her little intern had progressed as a teacher.

Because of the program, I was able to have a lot of experiences that I normally would not have had as a student teacher.

Cindi Moore Reeves '75

#### A Plea for Class Reunion Photos

As we approach class reunion time, I recalled that with the publication schedule changes last year, the class reunion photos did not appear in Towers.

From working with the 1961 Golden Reunion committee, I believe that class members who are unable to attend the gathering will appreciate seeing the photos.

For those not having reunion years, I see the inclusion of the group photos as a subtle advance notice that "Your reunion isn't far off" and a nudge in the direction of planning to attend when your number rolls around.

So I urge *Towers* to include space for the class reunion photos. These are as important to old timers as pictures of newborns are to the younger generations!

Peg English Duffy '61

Peg, check out pages 24-27. And visit Otterbein's website for even more photos of the weekend.

#### A Cappella Choir was Experience of a Lifetime

I read with interest the Spring 2011 Otterbein Towers letter from President Kathy Krendl about experiences of a lifetime. It brought to mind many experiences that impacted my life while at Otterbein. But I keep coming back to the experiences that center around the a cappella choir of the 1960s.

Few professors demanded the precision, respect and professionalism that Professor Richard Chamberlain demanded. He could terrify, challenge and mentor like no other. I was always in the front row of the choir and he would sprint forward and peer over my music to hear the pitch, tone and pronunciation. There was no room to be "wishy-washy." Once, when the soloist arrived at the concerttime with no voice, he turned to me and said, "Miss Lloyd, you are on!" I must have looked hesitant (like a deer caught in the headlights) because he said, "You can and you will!" I have often repeated that to myself when I have been hesitant to take on a new challenge.

I was most fortunate to travel with the choir to Europe twice after I graduated. We sang in cathedrals and concert halls in Cologne, Berlin, Prague, Switzerland, Italy and Paris, among other locations. To our amazement, Prof. Chamberlain spoke multiple languages and used his language skills to open many doors for us.

Not to be forgotten was the day we crossed behind the Iron Curtain at Checkpoint Charlie for a concert in East Berlin. Prof. Chamberlain warned us that there would be no foolishness at the checkpoint. We were unloaded and guarded by men with guns as the bus was searched and our passports checked. Not a sound was heard, except perhaps my heart.

Among all of my many experiences at Otterbein, none compares to those as a part of the choir. Prof. Chamberlain set the bar high and demanded that you strive for perfection. These experiences helped prepare me for later life challenges.

Margaret Lloyd Trent '65

#### A Graphic Design Home Run

Roger,

You hit the ball out of the park with the rebirth of the *Towers*!! The use of more white space, titles in bold, and small article photos make the contents page more lively and more readable. The cover is delightful and peppy.

The use of red color, much more white space and colored heads across the gutter tell the reader this is now a different ball game. The color reproduction is superb. The use of a variety of photo sizes makes layout more visually pleasing. Formal photos of teams are usually boring, but the soccer team photo is pleasant and intimate, and using it across the gutter was inspiring. I also liked the use of the lizards on page 18-19.

Keep up the good work. Bob Bradfield '50

#### **And More High Praise**

Roger,

The (Spring 2011) issue was by far the best formatted, best written and best subject matter Towers that I have EVER received. A job very well done. This in combination with the follow-up by President Krendl to our Greek Life conversation has won me back as ar Annual Fund participant...thank you both!

Richard Russo '64

Got something to say? We want to hear from you. We welcome your letters to the editor. You may send them via email to rroutson@otterbein.edu or mail to Roger Routson, Otterbein University, Department of Marketing and Communications, 1 South Grove Street, Westerville, OH 43081. The editoral staff reserves the right to edit all letters, and submissions are subject to space availability and suitability.

#### **Mystery Group Identified**

The unidentified picture found on the bottom of page 41 (Spring 2011) is a 1973 picture of the softball team.

Bottom row: Kathy Ronan, Kathy Ulmer, Patty Elliot, Patti Pifer. Top row: Nancy Harter, Dianna Johnson, Bonnie Everhart, Dawn Kasow, Carolyn Banks.

This can be confirmed on page 196 of the 1973 Sibyl. Howard Carlisle '76

P.S. Patti Pifer '75 is my wife and asked if I could identify the picture. We could identify all but one without looking up the answer. Not bad for 35 years ago....

Thanks, also, to Carol Brock Bower '73, Barbara Hoffman '74, Cindi Moore Reeves '75, and Sally Miller Riker '77 for writing in to also help identify the group. My apologies if I've forgotten to recognize anyone. See page 42 for a new photo to be identified. **Editor**

# Otterbein Signs Agreements with Community Colleges

President Krendl, at the lectern, with (from left) David Devier, vice president for academic and student affairs, Clark State; Dennis Budkowski, vice president of instructional services, Marion Technical; Karen Reed, vice president for learning, North Central; Chad Brown, vice president for academic services, Zane State; and Ryan McCall, academic vice president, Southern State.

tterbein University signed articulation agreements with six community colleges on May 19. Special guests at the signing included Ohio Board of Regents Chancellor Jim Petro and Association of Independent Colleges and Universities of Ohio (AICUO) President C. Todd Jones.

Now partnering with Otterbein are: Central Ohio Technical College, Clark State Community College, Marion Technical College, North Central State College, Southern State Community College and Zane State College. The agreement with Central Ohio Technical College encompasses its four campuses in Newark, Coshocton, Knox and Pataskala.

The articulation agreements facilitate the smooth transition of students from these two-year community colleges to Otterbein's four-year degree programs. More than 120 Otterbein students took advantage of the existing articulation agreement with Columbus State Community College in 2010-11.

Only Ohio School to be so Honored for Community Service

# Otterbein Finalist for President's Award

Otterbein University was a finalist for the President's Award for General Community Service as part of the 2010 President's Higher Education Community Service Honor Roll. Otterbein is the only school in Ohio to be honored as a finalist.

This is the fifth year Otterbein has been recognized on the National Honor Roll. Otterbein was one of the first institutions to receive the additional honor of winning the President's Award

for General Community Service through the 2007 Honor Roll program, which is administered by the Corporation for National and Community Service.

Established in 2006, the Honor Roll's Award with Distinction is one of the highest awards a school can achieve for its commitment to service-learning and civic engagement. The Honor Roll recognizes higher education institutions that reflect the values of exemplary community service

and achieve meaningful outcomes in their communities.

Otterbein's Center for Community
Engagement (CCE) brings together
volunteerism, service-learning and
community-based action research for
students, giving them a multitude of service
activities from which to choose. Eighty percent
of Otterbein's students participated in service
activities, contributing more than 70,000
service hours to the community in 2009-10.

# Otterbein Recognized as a "Gem" to the Environment

The Solid Waste Authority of Central Ohio (SWACO) honored

Otterbein with the EMERALDS Award in the environmental education category at its annual awards luncheon on May 17.

Otterbein was recognized by an independent panel of judges for its dedication

to sustainability education and initiatives under Sustainability Coordinator Paul Baldridge.

SWACO wrote: "With sustainability as a core value of the university, Otterbein University has committed itself to practices that promote waste reduction, recycling and reuse. Evidence of the University's commitment includes; metal recycling from ongoing

construction on the campus, the composting of 18 tons of animal waste and bedding per week, installation of individual building electric meters to monitor usage, the weatherization of 23 campus buildings,

and a Thrift Store designed to promote the reuse of unwanted items on the part of the University and Westerville communities. In addition, Otterbein networks and partners with several local green organizations and businesses to further sustainability efforts in the community."

Ron Mills, executive director of SWACO; David Bell '74, director of physical plant, Otterbein; and Bradley Frick, chair, board of trustees, SWACO.

# Women and Leadership Census

#### **President Teaches New Course in Leadership**

Otterbein recently partnered with The Institute on Women and Women for Economic and Leadership Development (WELD) for a census of women and leadership positions in central Ohio. The results of the Central Ohio Leadership Census (COL-Census) suggest that by increasing the number of women in

leadership positions, the community can improve its economic strength.

Currently, the numbers show widespread inequality in the representation of women in leadership positions across public and private companies, certain governmental entities, colleges and universities and non-profit organizations in central Ohio. There are no women among

the CEOs of 30 publicly traded companies in central Ohio, according to the survey.

President Kathy Krendl said that steps to increase the number of women in leadership positions would help the area to retain talented women graduates of central Ohio universities. "Otterbein University prepares students to become leaders. When they graduate and begin pursuing their

careers, we want them to think of central Ohio first as a place rich with opportunity."

The findings of the study are already influencing the development of curriculum at Otterbein, including a new course taught by President Krendl about women in leadership.

The COL-Census features data collected within the Columbus Metropolitan Statistical Area (MSA)

from a variety of publicly available sources, including 10-Ks, SEC filings and companies' internet sites. The COL-Census contains key statistics on the progress of women in leadership positions, tracking the number and percentage of women on boards and women executive officers, including CEOs. To see the full study, visit: instituteonwomen.org.

# Otterbein Hosts School for the Gifted and Talented

Otterbein University hosted the 2011 Martin W. Essex School for the Gifted and Talented, a week-long camp in June for 22 juniors and seniors from 10 central Ohio high schools.

The Essex School offers rising high school juniors and seniors opportunities for career exploration through a unique program comprised of classes, seminars and workshops on the arts, sciences and

humanities. The program encourages social interaction and peer discussion so that students can be challenged intellectually and develop a better understanding of the role of their abilities and talents in their lives and in society. Participating students have the opportunity to earn college credit and a \$1,000 scholarship to attend Otterbein.

Workshops and programming included: Printmaking and drawing;

creating theatrical character masks; studying turtles; environmental chemistry studies; a poverty simulation; discussion of this year's Common Book, City of Refuge by Tom Piazza, and the impact of Hurricane Katrina; and issues in sustainability, including a tour of Westerville Area Resource Ministry (WARM). The Essex School was sponsored by Otterbein University, Westerville City Schools and Olentangy Local Schools.

# A Q&A with the New Provost

Victoria McGillin recently joined Otterbein as the new provost and vice president for Academic Affairs. For her bio, and the full Q&A text, visit www.otterbein.edu.

#### What attracted you to Otterbein?

Absolutely everything – the people, the programs and the community! I believe passionately that universities must provide the educators and curricular/co-curricular programs that will enable our graduates to successfully address the unknown, diverse and poorly defined problem that the future will present. This calls for a very special learning environment that challenges and supports students in their learning across disciplines and across experiences.

#### What interests or excites you about Otterbein's national leadership in the field of experiential learning?

I am extremely excited by Otterbein's leadership in both integrative and experiential learning. I have had the good fortune to work at institutions that offered ground-breaking opportunities in global experiences, internships/fieldwork, student leadership, community engagement and scholarly/creative experiences, but never at an institution has that championed all of these critical learning opportunities. Otterbein truly leads the nation.

#### What do you think is most distinctive about Otterbein's integrative studies program and its approach to learning?

Again, Otterbein leads the nation. I have reviewed quite a few models of curriculum that were called "integrative." Many are quite good, but none have been designed by their faculty as deeply, thoughtfully and completely

as Integrative Studies at Otterbein. Otterbein does it all! From the first year through their senior year, Otterbein students will be both introduced to the integration of ideas by others and stimulated to engage in active integration on their own.

#### What elements do you think are important in great teachers and mentors?

As a clinical psychologist, I know that to grow and change, individuals must both be challenged to stretch outside of their comfort zone, and they must be supported as they take those risks. This is true both inside and outside the classroom, in our roles as faculty and as advisors. Great faculty must not only be knowledgeable in their fields, they must also be knowledgeable about how one masters that field – what sorts of learning experiences provide the richest challenges and support for learning at the collegiate and graduate levels. Ideally, this calls for active engagement with one's discipline and with the scholarship of teaching and learning. The

greatest faculty combine this with a genuine concern for the whole student, for his or her growth, and for the ways in which those students are integrating their learning inside and outside of the classroom.

#### What are you most eager to address in your first year at Otterbein?

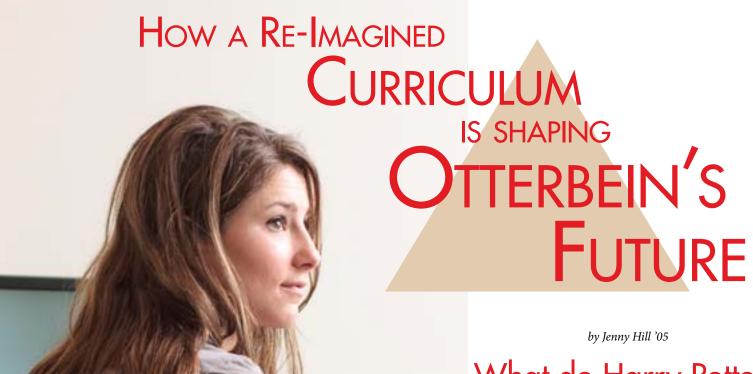

The Otterbein faculty and staff have spent the last three years transforming the curriculum and the university. We will now put all of this into action. My first year will be filled with the full implementation of the curriculum, leading our efforts to assess the student learning outcomes that we achieve, and revising or refining our work based on our outcomes. But my most important priority shall be the people of Otterbein. In my first year, I need to do all I can to come to know and support the growth and development of the faculty, staff, students and alumni of this institution.

#### What life lessons do you try to infuse into your daily work as well as those you lead?

Ask questions thoughtfully and listen deeply to the answers.

To the Otterbein Community, I want to meet you and to hear your life stories; I want to encourage you to seek ways of engaging with the learning experience of our students; and, I look forward to opportunities to engage with you and with the future of Otterbein University!

~ Victoria McGillin

# What do Harry Potter,

cavemen and sports have in common? They are all topics of new Otterbein courses designed to prepare Otterbein undergraduates for the challenges and complexity of a 21st century world.

Sure, it's not their parents' courses, but today's students face a world of merging ideas, cultures, experiences and opportunities never imagined by previous generations. As a result, an effective 21st century curriculum must combine broad and specialized knowledge, emphasizing interdisciplinary and integrative learning.

While some colleges and universities are struggling to keep up with the changing needs of curricula, Otterbein has established itself as a leader in the field. As one of only six universities nationwide to earn a grant from the Association of American Colleges and Universities (AAC&U), Otterbein joins such universities as Georgetown and Tufts in developing integrative curricula that will serve as models for other institutions.

The \$100,000 grant is part of the national *Bringing Theory to Practice Project*, funded by AAC&U in partnership with the Charles Engelhard Foundation and the Christian A. Johnson Endeavor Foundation. Otterbein is using the grant to fund a two-year project to further institutionalize the **Five Cardinal Experiences**, which provide high-impact, innovative, integrated and community-based opportunities for students and faculty. The Five Cards include: community engagement, global engagement and intercultural experiences, undergraduate research and creative work, internships and professional experiences, and leadership and citizenship.

Otterbein was one of 16 institutions nationally to be selected to participate in AAC&U's *Shared Futures: Global Learning and Social Responsibility* initiative in 2005.

According to Dr. Sarah Fatherly, chair of the Integrative Studies (IS) program and interim associate vice president of Academic Affairs, that award was a catalyst for the faculty to collaboratively begin rethinking and reworking the IS curriculum. "We've looked at what's working well, what still meets student needs and what doesn't. We wanted to preserve the core values of the program, while also meeting the needs of 21st century graduates," she said.

#### **A History of Innovation**

Otterbein's IS program was an innovative concept when it was established in 1969. It was originally called "Common Courses." The program was renamed "Integrative Studies" in 1976.

The changes to the IS curriculum are designed to enhance its integrative nature, in which courses fit together to create a focused, transformative experience for students. "The experience starts with the newly-developed **First-Year Seminar** (FYS) or Transition Year Seminar for new students. The first course introduces the concept of integrative knowledge and learning. The topics are interesting, exciting and unique, but all of them are designed to ensure students are working on foundational learning goals that will equip new students for academic success," Fatherly said.

In addition to their FYS course, first-year students also take a course in the Identity Projects requirement area, which also serves as a writing instruction course. Sophomore and junior students build on their first-year courses in higher-level threads, taking one course in each of four defined requirement areas that acquaint them with different disciplinary perspectives on the program's overarching learning goals. Seniors then take a dyad – two linked courses from different disciplines that fit together, for

example, environmental psychology and environmental ecology courses.

"Our new revised curriculum brings us back to the forefront of integrative general education," said Fatherly. "It has the potential to transform how students are learning, by setting up a framework in which they are more likely to make connections."

"The goals and outcomes addressed by the new curriculum will prepare our students as professionals and citizens, and impact their personal lives," she added.

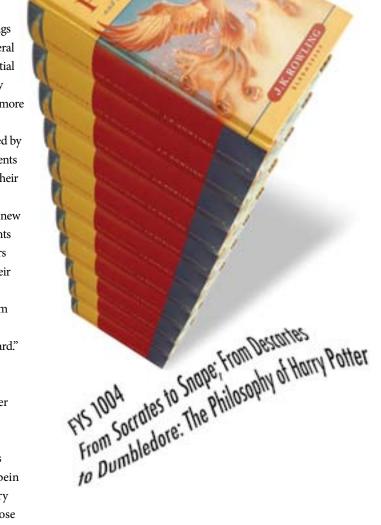

What do the students think of the new curriculum? According to Fatherly, students have been very receptive to their professors engaging them to learn what works for their generation. "It's been a lot of hard work, but we're very excited about the curriculum we have developed. We plan to assess and strengthen the program as we move forward."

#### **Senior-Year Experience**

The new IS curriculum will better prepare students for their **Senior-Year Experience (SYE)**. Developed in 1995, the SYE is a capstone course that allows students to reflect on their entire Otterbein experience through one interdisciplinary course. Students are encouraged to choose something they are interested in, concerned about or curious about, regardless of their majors. Some SYE courses are taught in the classroom, while others take students abroad to such destinations as Rwanda, Austria, Belize and even India.

To keep track of their progress as they navigate the IS curriculum and SYE, students will keep e-portfolios to assess their learning. "Each student will have an account loaded with the integrative core learning goals, and they will reflect on their learning as they move through the curriculum," Fatherly explained. "As they progress, they can look back at what they wrote as first-year students and see if they still think the same. It allows students to see how far they've come and allows professors to measure success on an individual level."

The e-portfolios also have features that can be used by career services. Students

"Our new revised curriculum brings us back to the forefront of integrative education. It has the potential to transform how students are learning."

Sarah Fatherly,

Chair of Integrative Studies

#### The Graduate School Offers New Alternatives

by Vicki Miller '06

New opportunities are being offered in The Graduate School at Otterbein.

Nursing students can advance their clinical expertise to the next level by earning a doctor of nursing practice (DNP) degree. Advanced practice nurses pursuing the DNP will be challenged to provide leadership to positively influence health care policy in nursing and health care organizations.

The Otterbein University/Grant Medical Center Nurse Anesthesia program is a collaborative effort preparing graduates for surgical and diagnostic anesthesia careers. Graduates leave with the competencies required to fulfill professional responsibilities as certified registered nurse anesthetists.

A post master's Adult Acute Care Nurse Practitioner program is anticipated for 2012. A final exciting development is the partnership of the nursing and business master's degree programs to offer the MSN/MBA dual degree. Designed to prepare the advanced practice nurse for upper level management positions, the program provides students with expertise through a combination of nursing service administration and graduate business administration coursework. This degree can be earned in as little as three years.

Otterbein's Master of Business Administration (MBA) program offers three new concentrations – information technology, fraud examination and actuarial science. These specially designed courses are for professionals who wish to sharpen their business skills, advance or change their career, or have a new learning experience. Certificates can be earned in information technology and fraud examination.

Through the Masters of Education (MAE) program, licensed teachers develop professional empowerment through study, research, and reflection. Two major areas of study are offered: reading, and curriculum and instruction. Within the curriculum and instruction major, non-endorsement emphases include professional development or theory and research for those preparing for a doctorate degree. For those with a baccalaureate degree who wish to teach, the MAT program provides a graduate route to teacher licensure in middle childhood education.

Teachers may also undertake non-degree professional development in the following areas: reading, TESOL, 4-5 generalist and 4-6 generalist endorsements, professional development, post-baccalaureate teacher licensure, and masters + . For more information about Otterbein's graduate programs in business, education, and nursing, visit www.otterbein.edu/graduate, or call (614) 823-3210.

can invite potential employers to see samples of their skills online.

#### **New Calendar**

Converting from quarters to semesters has created a unique opportunity for faculty to develop new curriculum. One benefit of semesters, according to Fatherly, is that students have more time to write, revise, reflect and learn about topics.

Semesters also present the opportunity for an immersion experience during **J-term**. On the new system this year, fall semester ends Dec. 15 and spring semester begins Jan. 30. Students can choose to take the long interim for immersive experiences, such as internships or global engagement, or take a three-week intensive course in January as part of the J-term experience.

"J-term is a time for students to explore something different without impacting their course loads. They can fulfill an Integrative Studies requirement in a way that might not be possible otherwise, like travel courses," Fatherly said. "J-term is ideal for more focused topics."

Professor of Religion and Philosophy Glenna Jackson co-leads an annual trip to the African nations of Rwanda and Malawi that will be offered as part of the new J-term in January 2012. Along with Professor of Biology and Earth Science Simon Lawrance, Jackson's course previously has explored such topics as the region's AIDS epidemic and its impact, genocide, mountain gorilla conservation, women's rights and poverty, among others.

Before departing for their experience abroad, students prepare in the classroom, where they get to know each other, the cultures and the logistics of the trip, and participate in fundraisers for African orphanages, schools, clinics and hospitals, and veterinary and wildlife clinics.

According to Jackson, what they learn in the classroom is just the beginning or the curriculum of her course. "Travel in African countries puts a literal face on what students learn about African cultures in the classroom. Suddenly, they can see, hear, smell, taste and feel Africa—not just know about it as an object of interest. No amount of classroom learning adequately prepares students for the trip, but that's also part of the fun," she said.

"Because we purposely travel as non-tourists, as much as that's possible, students begin to understand the dynamics of privilege and of poverty. We travel on buses with friends we've met along the way, we are hosted in their homes, we play with their kids, we sleep in their houses. Sometimes we sleep in the orphanage dormitory rooms. None of us can gain that perspective from the classroom," Jackson said.

When Jackson first traveled to Africa 11 years ago, she immediately thought of

her students. "One of my very first reactions was that I couldn't wait to get students to experience for themselves the richness of humanity, the depth of tradition, and the diversity of voices within the complexities of African cultures," she said.

A lifelong learner herself, Jackson learns just as much from teaching a travel course as her students learn from taking it "I am the epitome of someone who loves learning with the hope of an outcome of good teaching while weaving first-hand knowledge into advocating for the importance of the experiential."

#### A "Major" Facelift

In addition to the revised curriculum and new J-term, the semester conversion offered the chance to create **new majors** and give old majors a facelift. Otterbein students can now major in biochemistry and molecular biology, finance, global studies, human resources management, international business and management, management, marketing, public administration and sustainability studies. These new majors reflect current and future forecasts for job trends.

Other majors have been revised to meet current students' needs. The art major has been revised to include concentrations in art education and studio, while the English major has divided into English creative writing and English literary studies. Students interested in communication can now major in communication studies or journalism and media communication. In addition, the Spanish major has been developed into a Spanish education major and a Spanish and Latin American studies major.

Otterbein students can also look forward to such new minors as audio production, cultural anthropology, and film studies, among others.

From an updated curriculum and semester conversion to new J-term opportunities, majors and minors, there is a lot of change happening at Otterbein. It's all part of a well-planned strategy for Otterbein's future.

12 | Otterbein Towers | Summer 2011 | 13

# HIGHLIGHTS OF OTTERBEIN CURRICULUM

#### 1847 - Original Course of Study

Otterbein began with one course of study, soon broken into two areas: the Men's Course and the Ladies' Course. The Men's Course consisted of two specialties: Classical and Scientific. The Ladies' Course was a modified version of the Scientific Course. Each course of study developed a Preparatory Course to accompany it, allowing students without a strong educational background to be brought up to a university-level competency.

#### 1890s - Visual Arts

Painting and drawing were offered at Otterbein as far back as the 1850s, but they were treated as disciplines outside of the curriculum. Beginning in 1862 and continuing for 31 years, Mrs. Henrietta Thompson (left), the wife of President Thompson, taught painting and drawing. Due to her pioneering efforts, art was gradually integrated into the curriculum by the 1890s.

#### 1920s - New Academic Departments

To accommodate newly developing student interests and changing needs, a number of departments were formed. The Department of Business Administration was established in 1924. The Department of Physical Education was formed in 1926. The Department of Classical Languages and Literature was added in 1931

#### 1950s - Speech and Theatre

Dr. James Grissinger (left) and Professor Marion Chase added new courses and made major changes to the curriculum beginning in the early 1950s. When Charles Dodrill (right) arrived on campus in 1958 to head the Department of Theatre, and Fred Thayer (center) followed in 1960, the theatre became a major force in the cultural and intellectual life of Otterbein, resulting in regional and national acclaim.

#### 1980s & 90s -**Mastering Education**

The Master of Arts in Education and the Master of Arts in Teaching were first offered at the end of the 1980s. The Master of Science in Nursing was added in 1993 and the Master of Business Administration was added in 1997.

1995 - SYE and the Common Book

The Senior Year Experience (SYE) was established in the fall of 1995. Designed to help students focus on significant contemporary issues, the SYE provides opportunities for students to act, reflect and prepare for transition into the community and into the world. 1995 was also the first year of the Common Book, a program that has all incoming freshmen read the same book followed by the author's visit to campus.

#### 1873 - Music Added

Music has been part of the Otterbein experience since early in its founding. However, it was considered to be extra-curricular prior to 1873, when a listing of music classes was first added to the course catalogue.

#### 1900s - Bachelors Only

In 1895, the doctorate program was discontinued but the master's degree continued to be offered until 1912. Based on the new curriculum standards adopted by the state of Ohio, the Philosophical Course (Ph.B.) was entirely eliminated in 1902 and all undergraduates were henceforth awarded either a Bachelor of Arts (BA) or a Bachelor of Science (BS) degree.

#### 1920s - Accreditations

As Otterbein moved forward with curricular changes, it gained Class "A" recognition from the Religious Education Association in 1925. Also in 1925, it received accreditation from the Association of American Universities, and in 1929, from the American Association of University Women.

#### 1965 - The 3/3 Plan

Led by Academic Dean James Miller, a group of professors developed an innovative calendar/curriculum plan to "provide greater integration...promote the development of academic excellence...and encourage genuine independent learning." The 3/3 Plan was adopted in 1965 and implemented in 1968. The academic year was divided into three 10 week terms, and students took three academic classes during every term.

#### 2010 - Five Cardinal Experiences

The Five Cardinal Experiences are: Community Engagement; Global Engagement and Intercultural Experiences; Undergraduate Research and Creative Work; Internships and Professional Experience; and Leadership and Citizenship. These experiences encourage undergraduate students to become involved outside the classroom as they move forward on their journey toward becoming contributing members of a global society.

#### 1870s - New State Standards

Starting in the 1870s, Otterbein was involved in the new standards for higher education being established by the state of Ohio. For example, in 1881, the Philosophical Curriculum replaced the recently retired Scientific Course.

#### 1910s - Semesters and Letter Grades

Otterbein switched its calendar year from three quarters to two semesters. Each course was assigned specific numerical credits. Public speaking was integrated into regular course work, contributing to the decline of the literary societies. A letter grading system was adopted. Otterbein was granted membership in the newly-formed Association of American Colleges.

#### 1883 - Graduate Degrees

Graduate-level work was first offered at Otterbein in 1883. The students who enrolled in this program lived off-campus but came to Westerville to present papers and be examined by the faculty. The first three doctorate degrees were awarded in 1889.

#### 1917 - University to College

As early as 1895, Otterbein administrators were questioning the validity of the designation "University." In 1914, the trustees recommended that the name be changed, and the next three years were spent gaining both alumni support and the approval of the church conferences that supported the school. Finally in 1917, through an act of the state legislature, Otterbein University officially became Otterbein College.

Burn Clauseum Comore

#### 1920s - Commitment to the Liberal Arts

Rising out of Classical and Hellenistic Greece, and later becoming a standard in Roman and Medieval times, the "Liberal Arts" had historically sought to impart general knowledge and foster critical thinkers. Embracing this philosophy, higher educational institutions in the United States began structuring their curricula in the late 1920s to immerse students in a wide range of disciplines rather than focusing on a narrow line of courses or skill sets. Otterbein's tradition for developing well-rounded students led them to embrace this "Liberal Arts College" movement and the University continues to be committed to this doctrine.

#### 1976 - Integrative Studies

In 1976, the College absorbed the Common Courses into a larger framework called Integrative Studies, more commonly known as IS. While preserving the focus on human nature, IS added the additional intent to foster a "life-long habit of integrating ideas and experiences from many areas." Courses were revised to develop critical thinking, research skills and persuasive presentation of ideas.

#### 1976 - Equine Department

In 1976, Otterbein established its nationally recognized Equine Science program for students interested in pursuing careers as varied as stable owner and veterinarian. At first, it was under the umbrella of the Department of Life and Earth Sciences but as its popularity grew, it became its own department. Experiential learning occurred at stables leased off-campus. Soon, a competitive equestrian team was created.

#### 1939 - First Student Teaching

In 1939, Otterbein entered into a partnership with the Westerville Public Schools to place education students in the classroom to gain first-hand teaching experience.

## 2011 - Doctor of Nursing Practice (DNP)

In 2006, responding to the national initiative of the American Association of Colleges of Nursing for advance-practice

nurses to have a practice doctorate, the Department of Nursing received approval to develop a post-master's degree program. The first ten students, all of whom were practicing or educator nurses, enrolled in March 2011.

#### 2010 and 2011 - Return to "University" and Semesters

After 93 years, Otterbein College was officially renamed Otterbein University in July 2010. This reflected the growth of the graduate programs and the overall expansion of OTTERBEIN Otterbein's educational offerings. In the fall of 2011, the conversion of the academic calendar from quarters to semesters will be complete, allowing students greater opportunity for extended research in the classroom and better access to internships and other off-campus opportunities.

A Q&A with Susan Fagan, Associate Vice President and Dean of Academic Services

oday's students are learning new information to prepare themselves for 21st century careers, but so are adult learners. In fact, many people turn to

adult learning opportunities to prepare themselves for an "encore careers," or career changes pursued later in life.

Towers talked to Susan Fagan, associate vice president and dean of academic services at Otterbein University, about encore careers and her personal experience with new careers. She has worked in not-forprofits, the telecommunications industry and her own consulting practice before beginning an academic career. She also discovered a passion for art later in life, and is pursuing her own long-delayed dream of becoming an artist after earning her master of fine arts degree from Goddard College in 2010. Remembrance: Art Made at the Intersection of Horror and Hope, a collection of works by Fagan inspired by the Holocaust, was on display at Otterbein's Fisher Gallery in Roush Hall by Jenny Hill '05

#### What is your experience working with people considering encore careers?

For eight years of my 18 at AT&T, I worked as an ombudsperson. Though many issues come to an ombudsperson, the one that seemed to show up so often were those who were saying something like this: "I feel as though I've outgrown my job, this company, but I have no idea what to do instead or even how to figure it out. And I am scared; I make a good living here. How can I even think about walking away from that?" Over time, as I collaborated with people making their way through transitions of all sorts, I realized how very normal and predictable is the need to continue to grow, and to follow new dreams.

People of my vintage are either retiring or preparing for retirement, and are considering what to do next. I know not a single soul who simply wants to sit on a porch, rocking their way to the end of life. Again, I delight in the resiliency of people finding themselves once more redefining and expanding their roles in the world. One adventure opens the door to another, and the evolution is more organic than charted.

#### What motivates a person to pursue an encore career?

continue to expand and grow their interests in new directions over their lifetimes. After relishing a career in one area, someone

may long for new adventures and different challenges. All the learning from one phase of life may open doors and form the foundation

launched. Being downsized, or retiring and pursuing a deferred dream also can trigger such a change. Stories abound about people who realize their life

#### How can one prepare oneself for an There are many possible reasons. People

Knowing oneself well and being attuned to the inner and outer signals that presage change

well, and now no longer does.

encore career?

Life offers frequent opportunities

for reinvention. What was once fulfilling

can become restricting, and a person's inner

compass then acts as the catalyst for change.

create the most fertile ground for mindful change. Paying attention to the ever-evolving landscape of careers that pique one's interest may also serve as inspiration for a new endeavor. Through networking, people can discover opportunities that had never been on their radar before, and can then explore those opportunities for potential matches. Sometimes, it is a longing that remains from childhood that can foreshadow a new direction for someone.

#### How much formal training/education is required to change careers?

It depends. If a teacher wants to become a doctor, quite a lot would be required. If a person wants to leave the corporate world and become an entrepreneur, he or she may able

What are some of the challenges faced by people who change careers? Fear is perhaps the largest challenge of all. Leaving comfort can scare people; they wonder and ponder before making the leap—and sometimes after making the leap local colleges, as well. What is safe and secure can also be Small Business binding and limiting. Certainly it is critical to Association, understand one's own relationship with change SCORE, and the prior experiences with risk which libraries, atcolor that relationship. Robert Quinn puts the challenge quite powerfully and simply. He torneys and accountants, says we only have two choices: "deep change or slow death." (Robert Quinn. Deep Change: few. Discovering the Leader Within. Jossey-Bass: San Francisco CA, 1996.)

Planning for the practical side of the change is a challenge as well. Understanding the financial and lifestyle implications are critical and occasionally daunting, though not insurmountable.

not have been for years. They use words

like "following a passion or a dream," feeling

delightfully once again at the beginning of

something, rather than at the end.

#### Do you recommend that people pursue encore careers?

As a several time career changer myself, I would say a very hearty yes to any who feel they are no longer a match for what they are doing, and feel a need to follow emergent passions. If one finds he or she wakes up on most mornings dreading the day to come, that is certainly a sign that change may be vital.

now live longer than ever, considering some encore event—whether it is career, volunteerism, public service, creative work—seems a useful endeavor. Having goals for later in life infuses those years with an extra energy. I have seen some adults after retirement lose focus and pleasure in living, and I have seen others reborn as they follow interests or hobbies or service that may have hovered only in the background earlier in life.

Assistant Editor's Note: Otterbein hosts many opportunities for adult learners, from free classes for senior citizens to our free Graduate Symposium speakers and other public lectures. This year, we offered a variety of summer learning opportunities for adults. They included on-campus opportunities taught by Otterbein professors, like Create Your Legacy: Enriching Your Life Through Memories and Storytelling; Horsing Around: An Otterbein Equine Science Camp; and OP2: Operation Physics for Central Ohio Middle School Teachers (funded by the Ohio Board of Regents). Additionally, an off-campus teacher

Encore Career

# Sie Career Dolce Dolce Dizz

Betsy Krick Skrobot '88 went from nurse to pastry chef and entrepreneur. She is now living the sweet life with her own business, Sweet Dolce.

by Roger Routson

t's clear in talking to **Betsy Krick Skrobot '88** that she very much has a sweet tooth. "Dessert is my favorite part of the meal," Skrobot said. But what is also apparent is that she has a big sweet tooth for life. "One of the big reasons I love life so much, is I love what I do." Ah, la

Skrobot is a poster child for those considering an "encore career." For her, it couldn't have worked out better. Once a nurse, she is now a pastry chef and the owner of her own business, Sweet Dolce.

Skrobot graduated in 1988 from Otterbein in nursing. She was part of the 2 + 2 program allowing her to earn an associate degree (and the right to take the state boards and be licensed as an R.N.) after two years, and then continue for two more years to earn a bachelor's degree. Upon graduation, she went to work for Children's Hospital in Columbus, and subsequently worked as a nurse in both St. Louis, MO, and in Zanesville, OH. Pediatric nursing was her calling. "I loved working with children," she said.

In the 1990s, as she was having three children, she "dabbled here and there" in her work. She took shifts as a contigent/PRN nurse, she worked for RSVP (Responsible Social Values Program) where she went to middle schools to teach about abstinence and the importance of making good life decisions, and she also worked as an office manager for her husband, <code>David</code> '88, in his podiatric practice.

But by 2003, she was ready for a change. "I felt I needed a creative outlet that nursing didn't provide. So I said to myself, 'What is it I really love to do?' And the answer was baking." So back to school she went, to Zane State Community College, where she got her associate's

"I LOVE WHAT I DO. I LOVE HAVING MY OWN
BUSINESS...I'M JUST SO HAPPY WITH THE PATH MY LIFE
HAS TAKEN." ~ BETSY SKROBOT

degree in culinary arts. Upon graduation, she went to work for a local restaurant, but "that was not conducive to also raising a family," she said.

Skrobot assessed her options: pastry chefs in the Zanesville area were not in high demand, and commuting or moving to Columbus was not considered. The answer was clear—start her own business. Sweet Dolce was born.

The business has no store front. "I have a great kitchen in my house," Skrobot said. "That's where I work." Business is by phone only. Nothing is pre-made, and everything is customized to the individual client. "I talk to customers about their preferences—favorite flavors, favorite colors, and so forth." In essence, she loves to create unique desserts designed specifically for each client. Those clients have included groups such as the Obama for America campaign, the Southeastern Ohio Symphony Orchestra, Longaberger Baskets, and the Zanesville Rotary Club. Orders can range from a dozen cookies to a full-fledged wedding dessert buffet.

And Skrobot has not forgotten her love for teaching. She has been an adjunct

faculty member of Zane State, teaching baking, since 2007. One of her former students works for her part time.

She looks back on her Otterbein education as paving the way for the rest of her life. "In the 2 + 2 program, the first two years are very clinically oriented and very focused on nursing skills. But the last two years taught me a lot about management, about employee relations, and about running a business." Skrobot said she feels like that education opened different positions for her in life beyond just nurse—such as head nurse, office manager, teacher—and that all those experiences help her in her current endeavor.

When asked if she had any advice for today's Otterbein students, she said, "Just really appreciate all of your experiences. They will all impact your life in ways you don't even realize at this point. Breathe it in. It's a special time in life and you don't get to do it again."

Meanwhile, she'll be living the sweet life. "I love what I do, I love having my own business. It allows for a lot of creativity.

And I love to teach. I'm just so happy with the path my life has taken."

# E Alumni Neekend

Otterbein welcomed back alumni from 25 states during Alumni Weekend 2011. Reunion Classes of '51, '56, '61, '66, '71 and other alumni came to campus to reflect on their years at Otterbein and reconnect with old friends. Alumni participated in a variety of events including campus tours, open houses, exhibits, reunion dinners, and a series of presentations called Classes Without Quizzes, which focused on Otterbein's history, using social media, and learning about the University's Community Garden. See more photos from Alumni Weekend www.otterbein.edu/alumni/photos.asp

There were a variety of Classes Without Quizzes offered to Alumni Weekend guests, including a tour of Hanby House, above.

recently selected to serve on the Board of Ohio Nature Education, a nonprofit organization located in Johnstown, OH, dedicated to providing a home for animals that can no longer live in the wild. The group also conducts environmental education programming throughout the central Ohio area.

Janet McCann '63 - English

# English and Language is Her Beaker of Tea

When Janet McCann '63 arrived at Otterbein as a freshman, she had no idea what career path she wanted to follow. "I was pretty naïve," she said. "I started out as a major in chemistry, but found that I was enjoying the English classes so much more." That English degree has certainly paid off; McCann has taught English at Texas A&M University since 1968.

Once she found her calling, McCann became editor of the Tan and Cardinal and minored in French and German. Her language skills have enhanced both her travels and her research into essays and poetry by French writers.

After graduation from Otterbein, McCann went on to graduate school at the University of Pittsburgh. She credits her experiences at Otterbein with helping her get the position at Texas A&M, because her Otterbein professors made interviewing for internships or jobs part of the curriculum. "One thing all of the faculty members did was form panels for us. They had us answer questions as though we were in an interview. It really taught me how to be a good candidate."

For the most part, McCann teaches classes in creative writing and women's novels. This fall, she heads to Italy to teach women's

novels based in Italy at the university's campus near Arezzo.

McCann said she enjoys being engaged with students at the college level: "They keep me awake and alive, inform me of cultural or current events I would otherwise miss," she said.

She has found over the years that "students haven't changed a lot except in their backgrounds. Now, there is no longer a common educational foundation. Some have read no Shakespeare, for instance."

According to McCann, today's classroom has become "more distant yet more participatory. I've taught online, for instance, and that's an interesting experience. In a classroom, it's difficult to make sure everyone participates. When you're online, you can require so many participation credits."

McCann's personal focus is on poetry. Not only has her research concentrated on poetry, but she herself is a poet, having written several volumes, as well as five chapbooks.

Program on the campus of the University of Mount Union.

Mary Jo Monte '87 competed in a four-man open mixed team of canoe racers and they finished fourth in their class of 26 teams in the Ocean to Ocean Cayuco Regatta in the Panama Canal.

Beth Allen Thatcher '87 and husband, John '86, celebrated their 25th wedding anniversary in June.

Patrick Baker '89 is now the associate head coach of the University of California Golden Bears women's soccer team. Prior to that, he was the head soccer coach of Rollins College for one year and was the all-time winningest coach at : the independent film drama

the University of Georgia from 2007-2009.

#### LeighAnn Inskeep-Simpson

'89 was chosen as an Outstanding Teacher at Urbana High School, Urbana, OH, by Lauren McCurdy, an incoming Otterbein freshman who will be in the Class of 2015.

Robert Witherow '89 was the stage manager for the Broadway performances of Million Dollar Quartet, Boeing Boeing, Next to Normal, Avenue Q, La Boheme, and Putting It Together He was also the theatrical stage supervisor for the film Burlesque.

Dan Knechtges '94 is directing and choreographing the Transport Group's production of Lysistrata Jones, which opened this summer in the Judson Memorial Church Gymnasium in NYC. The production is being staged in an actual gymnasium reflecting the setting of the play where the Athens University basketball team hasn't won a game in 30 years. The pop musical comedy is adapted from Aristophanes' comedy, Lyistrata, giving the classic Greek tale a new twist.

#### David Phillips '71 - Music Education

# This Musician's Career has Hit Many Diverse Notes

"This is a pretty exciting time to be in higher education," commented David Phillips '71, director of the Arts Institute and associate dean for the arts at Montgomery College in Rockville, MD. "There's a realization now that just teaching in the old ways—generally the lecture and test process—is not always the most effective. We're doing more with helping students learn critical thinking skills, creative thinking skills, and teaching them to become problem solvers."

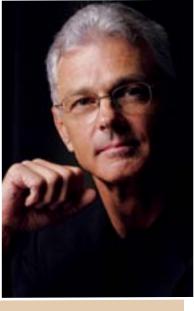

Phillips says his time at Otterbein was helpful in teaching him creative problem-solving skills, both inside and outside the classroom. "Being in Kings fraternity with a very diverse group of brothers who came from all over the country, and band tours to New York City, Chicago and London, were particularly strong growth experiences."

Since receiving his degree in music education, he has had a number of exciting career opportunities. Early in his career, he served as volunteer administrator for the Baltimore Chamber Orchestra. This ultimately led to his next job as director of the Baltimore Symphony Orchestra, then head of the corporate contributions program at Lockheed Martin.

"Over the years, opportunities have opened and I've been happy to step into them," he said. "So far, every job has been fun."

And through it all, he has continued to play the French horn. He maintains a small studio, where he continues to teach private lessons.

As for adapting to a new era of education, he believes that "leadership at a college or university needs to inspire among the faculty an eagerness to embrace new ways of teaching that will be

relevant to the new characteristics of each incoming group of students. We...help the instructors be their best, challenging them to reevaluate what they teach and how they teach it."

#### Deborah Grove '75 - Life Science

## Broad View Leads from Poetry to Genetics

As director for genetic analysis of the Genomics Core Facility at Penn State University, Deborah Grove '75 works with machines that cost up to \$500,000 each. In fact, the facility holds over \$3 million worth of equipment, and it can cost researchers up to \$15,000 to use that equipment for just one test.

"I am responsible...for helping undergraduate and graduate students obtain results in their research. As a core facility, we have these expensive machines that a researcher can't afford to have in the lab. And the students often need advice on which services to use, how to prepare samples and how to analyze the results."

A life science major at Otterbein, Grove went on to study biochemistry at The Ohio State University, where she received her doctorate degree. She and her husband joined the Penn State University staff in 1984 as researchers. She became director of the Genomics Core Facility in 1996.

"When I started in this position 15 years ago, Sanger sequencing gave researchers 400 bases of the DNA sample they submitted. Now, next-generation sequencing (NGS) returns 80 billion bases. The cost has also gone down from six cents a base

#### Ken Jewett '76 - History

# Retired Military Man Turns Novelist

Ken Jewett '76 keeps history alive through his series of novels, using his own family as characters living through the Revolutionary War.

Combining his love of history with his extensive military experience, Jewett has created a three-book series that chronicles the struggles of a family living in colonial Virginia. His first book, *To the Valley*, was nominated for a Pulitzer Prize by its publisher, Ithaca Press.

The Valley series actually began as letters written by Jewett to his nephew. When visiting historical sites such as Williamsburg, Jewett would write as if he were living during that time period.

A history major, he joined the Air Force after graduation, specializing in intercontinental ballistic missile operations for 22 years before moving into the diplomatic arena. It wasn't until he retired as a colonel after 30 years of service that Jewett expanded those early letters into a book.

The first novel started as a way for his two nephews to connect with a grandfather they had never met, as well as with other family members from the past. "I use a lot of family names in the books; it makes it fun for them," he said. In fact, the stories revolve around the Jewett family, who often interacts with well-known figures, including George Washington and Daniel Boone.

While his writings are set in the past, the writing process is very much a part of the 21st century. "How I've written has changed a lot," he said. For instance, to locate a publisher for his books, he simply searched online. "I don't send them a fat envelope with pages anymore. They want an electronic copy. The editor sends her comments back via e-mail. Other than the gallery proof, which is paper, all work is done via 21st-century methods."

Jewett's early experiences at Otterbein have helped him in both his military and his writing careers: "The best thing about an Otterbein education is you have to learn, you can't hide in a large lecture hall," he said. "Beyond writing your paper in proper English, you also had to do proper research so you actually had something to say.... Defending myself before Drs. Hancock and Holtermann was more nerve-wracking than standing before any general, precisely because they had taught me so well."

# We're looking for future Cardinals!

#### Sarah Martindell '08 - English

# Teacher in Africa is a Student of the People

Like many Otterbein grads, Sarah Martindell '08 is an educator. Unlike most Otterbein grads, she teaches in the African nation of Namibia with the Peace Corps.

Martindell joined the Peace Corps in October 2010 with a sense of idealism, which she said can "quickly be replaced by homesickness, frustration with the education system here, and just general stress that comes with being a teacher."

"But those were good wakeup calls," she added. "And the challenges, though difficult, don't dominate my experience here."

Martindell teaches English, physical education and a library class to about 170 students in eighth through 10th grades. School starts at 7 a.m. and ends at 1 p.m., with a

0

The only spot Martindell's found where she can get an internet signal.

30-minute tea break in between. The students live in a hostel, visiting their families only about once per

When she began teaching, "a couple kids made life miserable with their discipline and behavioral problems. But they stuck with me, I stuck with them, and now they're 180 degrees different. We each became a real person to one another," she

While 21st century technology has helped her to

teach—she uses a flash drive to exchange lesson plans and other information with fellow volunteers—she has left behind many of today's conveniences that we take for granted. The school doesn't

have telephones, fax machines or the Internet, and many days, the cell phones don't have service.

"But that forces me to get creative," she said. "I feel like I'm using parts of my brain that have been deadened for a while, numbed by letting technology do all my thinking for me. Solving problems on your own, without consulting Google, can be a liberating experience," she said.

An English major with a minor in religion, she credits Otterbein for "helping me know how to be with people who are different than I am. The religion courses helped me see how others live, think, believe. I learned that the difference between cultures is not an issue of who's right and who's wrong. We're simply different. We're diverse. If anything, Otterbein didn't teach me how to educate people, it taught me how to be a student of people. That's what I want my life to be about."

Sarah Martindell (holding glasses) with other faculty at the school in Namibia where she teaches English and Physical Education.

#### Andrew Chrismer '08 is

currently in graduate school at American University's School of International Service. His focus is European Political Economy and International Trade. This summer includes an internship in Brussels at the European Commission, then a month in Berlin studying German. When he returns to the States, he will spend a semester as an intern for the State Department in the Office of Central Europe.

Lizzy Hewitt '08 sis a physical therapy student at the College of Mount St. Joseph's in Cincinnati,

Kendra Knight '08 is employed part-time by OrthoNeuro rehabilitating patients and is the assistant athletic trainer at Pickerington Central High School in Pickerington, OH.

Carly Knisley '08 is in nursing school and working as a certified pharmacy technician.

Carly Lee '08 is the athletic trainer at Hamilton Township High School in Columbus, OH

**Tom Long '08** is a physical therapy student at the College of Mount St. Joseph's in Cincinnati, Ben Moldenhauer '08 is living in the Houston, TX, area working as an actuary for Aon Hewitt in Retirement Counseling.

Roger Payne '08 is serving in the U.S. Air Force as an electronic warfare technician with the 20th Fighter Wing at Shaw AFB, in SC.

Carmen Rowlands '08 is the artist in residence at Bowling Green High School, where she has assisted with theater productions

for the last few years. She recently was involved with a project merging theater, technology and science. The project explored the concepts of inertia, vertical force, optics, color and sound on the stage of the district's Performing Arts Center, in cooperation with the drama and science departments.

Julie Scarpelli '08 is a first year occupational therapy student at The Ohio State University.

Kevin Stahr '08 is an occupational therapy student at The Ohio State University.

Amanda Benson '09 is a graduate student at Barry University in Florida.

# The Mace and the Flambeau

The mace and the flambeau can be seen at commencement ceremonies carried by bearers leading the graduation procession. Both were commissioned by former president Lynn W. Turner (1959-1972). The mace, ith the globe of the world, represents the educational authority of Otterbein. The flambeau, with its light, represents the light of learning bestowed by Otterbein.

We think it's a sock hop at the Student Union, and it is believed to be from 1947. Can you help us out here and tell us when this is and who's in the picture?

#### Ladies...take aim

This photo was plucked from a collection of slides from 1942. This apparently was a Phys. Ed. class, and probably held outside of the Alumni Gym (site of the current Battelle Fine Arts Center).

MATTERS

# Cardinal Tales

by Becky Fickel Smith '81, director of Alumni Relations

Top-quality professors have long been a standing tradition at Otterbein, going back to its founding. Professors like Price, Vance, Wray, Chase Hancock, Day, Ludlum, Daugherty and many others open our minds to possibilities, opportunities and awakenings.

We have all walked the brick pavers of Otterbein to encounter faculty who broadened our perspective and challenged us to stretch beyond our comfort zone. Still today, we live by their words of wisdom and use the learning experiences provided in the classroom in our career journey. I continue to live by my mentor's advice and share with others each day

"You can deal with what you know." - Joanne "Dean" Van Sant

"People can steal your wallet, your purse and your car. The only thing they can't take from you is your integrity. You have to give that away." - Marilyn

"Leave them wanting more." - Bob Gatti

Recently on the Otterbein Facebook page, alumni were asked 'what experiences or advice do you continue to use in your career which you learned from an Otterbein professor?' We are touched by words, actions and deeds of others for a reason, for a season and for a lifetime. At homecoming on Saturday, Sept. 24, members from the Otterbein Quarter Century Club (comprised of Otterbein professors and staff who have at least 25 years of service at Otterbein) look forward to welcoming you home.

**CARDINAL FOOTNOTE:** Join the conversation at the Otterbein University Alumni Facebook page at **Facebook.com/Otterbein**. Watch for Tuesday Trivia each week and post your comments!

"Dean Van"

Joanne Van Sant

What experiences or advice, learned from an Otterbein professor, do you continue to use in your career?

#### Michael '08 / Business, Dr. Don Eskew

"Leave your mind and heart open to all opportunities that come your way. Even if it does not make sense to you at the time, be open to the possibilities that lie ahead."

#### Terri '58 / Dr. Harold Hancock – I took every class he taught, and he was the person who encouraged me to be a Washington Semester Student, a major turning point in my life.

Holly '93 / Capstone Culture Course with Dr. Chris Reynolds - It provided great real life lessons and memorable examples. During a four month assignment living in Shanghai, China, this initial base of learning was most useful.

#### Ash '91 / PR Ethics with Dr. John

**Ludlum** – The debates were great and he really made us examine all sides of issues and define our positions. We also had to determine how those positions would impact various audiences and respond to them. It was a very thought-provoking

# Club News I

Three generations of Mentzers: Clockwise from top, Ed Mentzer '58, Connie Myers Mentzer '60, Lisa Mentzer Carter '85 and incoming freshman Rebecca Carter '15.

For the first time a classic car show was part of the festivities at the June Bug Jamboree. Shown is Wayne Wright '60 with his Ford Mustang. Behind the car are his wife, Susan Allaman Wright '60, Barbara Puderbaugh Gribler '60 and Jerry Gribler '60.

# June Bug Jamboree

The 15th annual June Bug Jamboree for Dayton area alumni and friends was held on June 25 at the home of Bill '48 and Helen Hilt LeMay '47. A large crowd of almost 100 enjoyed a delicious catered picnic, hayride driven by Ed Mentzer '58, fishing, children's crafts, cornhole, a nature hike with Bob Henn '57, a classic car show, and the wonderful singing of the serenade songs and Otterbein Love Song led by Jim Shand '51.

## Kick Off to a New Tradition

The Class of 2011 was welcomed as Otterbein's newest alumni at the Kick-Off to Commencement celebration on June 9 at the Medallion Club. "It Only Takes A Minute To Get Involved" was the theme this year as various Alumni Club members, Otterbein staff and alumni benefit partners spoke about the opportunities to stay involved with Otterbein after graduation.

Left: Matt O'Rourke '11, Drea Blaine '11 and Rashaine Thomas '11. Right: Brand new alumni from the Class of 2011.

From left, Annette Harting Boose '94, Jane Morrison Horn '50, emeriti and former parent Sylvia Alspaugh, Jan Madak O'Daniel '86 and Alumni Director Becky Smith '81. Not pictured: Jim Wagner '56 and Shannon Lord '00.

#### Celebration of Service

Six dedicated alumni and volunteer friends were honored at the annual Celebration of Service ceremony hosted by the Center for Community Engagement on May 25. These alumni and loyal friends went 'above and beyond' in their volunteer time and efforts to assist the Office of Alumni Relations and we thank them for their ongoing dedication.

#### African American Hall of Fame

The African American Hall of Fame was established in 2008 to recognize outstanding African American Otterbein alumni. Each year, we honor two graduates, one male and one female, who are chosen for their professional accomplishments and service contributions to Otterbein and to their community. The 2011 Awardees, Sarah Barrett '02 and Jason Jenkins '04, received their awards at the Black Baccalaureate ceremony on May 27.

Sarah Barrett '02, President Krendl and Jason Jenkins '04.

Things are different in the desert. The sky is bigger. The stars are brighter. The sunsets stop you in your tracks.

Join Otterbein Cardinals as we migrate to America's sixthlargest city, Phoenix, AZ.The city is the gateway to the Grand Canyon, and its history is a testament to the spirit of the Pueblo tribe, ranchers, miners and visionaries. Projected against this rich backdrop is a panorama of urban sophistication; the museums and attractions offer unique Southwestern experiences. This is Greater Phoenix — Arizona's urban heart and America's sunniest metropolis.

Mark your calendar and watch for the Cardinal Migration Brochure which will be arriving in your mailboxes in January 2012.

# 2011 Cardinal Migration: Baltimore, MD

Otterbein Cardinals traveled to Baltimore, MD, to experience centuries of American history from the Battle of Baltimore in 1814 to the Civil War to American's First Cathedral to the nation's capital. The weekend was full of Otterbein connections including **Rob Burk '00** arranging tours to the Maryland State House and U.S. Naval Academy. A highligh of migration was a visit to the Old Otterbein United Methodist Church and Cemetery where lies the grave of Philip William Otterbein whom Otterbein was named in honor. Visit **www.otterbein.edu/alumni** and click on "photos" for additional pictures.

Top: Peggy Smart Ginn '74 and Jerry Ginn '68 visit the World War II Memorial on a post migration trip. Far left: Cardinals visited the Old Otterbein Church, where Phillip William Otterbein, the namesake of Otterbein University, is buried. Left: Richard "Hop" Rufener '61 and Carol Shook Rufener '63 are greeted by local Baltimore host, David Henn '91.

# Inaugural Young Alumni Awards to be Presented at Homecoming

We're rolling out the red carpet for our 2011 Young Alumni Awardees.

Otterbein University will present the inaugural Young Alumni Awards during Homecoming Weekend. Otterbein will recognize eight selected alumni age 40 and under who put into action Otterbein's Five Cardinal Experiences (community engagement, global engagement and intercultural exchange, research and creative work, internships and professional experience, and leadership and citizenship) in their daily lives. The Five Cardinal Experiences not only serve to prepare students in their professional and academic pursuits, but also help them to become informed and engaged alumni in our global society. To read more about the Five Cards, please visit www.otterbein.edu.

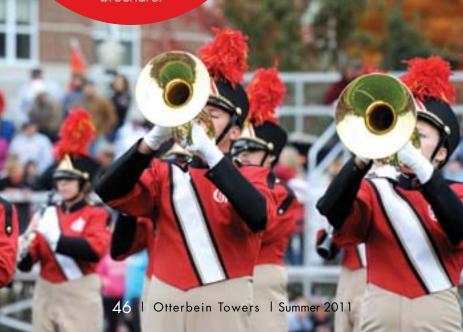

A committee within the Alumni Council selected eight individuals out of a field of 36 incredible nominees submitted by alumni, faculty, staff, parents and friends of the University.

All alumni are invited to join us on Friday evening, Sept. 23, at 7 p.m. on Towers Plaza Roll Out the Red! as we roll out the red carpet to recognize

these individuals who exhibit consistent devotion to their professional career and a strong desire to bring about meaningful change within their community and the world. Register online, www.otterbein.edu/alumni and click "Events and Registration."

# 2011 Alumni Award Winners

For over 50 years, Otterbein Alumni Awards have honored individuals who have demonstrated Otterbein's excellence through their outstanding achievements. Whether in their careers, their service to others, or their service to their alma mater, we are proud of our alumni and their accomplishments. During Alumni Weekend, Otterbein recognized seven alumni for their achievements during the annual Alumni Awards Luncheon on Saturday, June 11. Those alumni are **David Yohn '51**, Distinguished Alumnus Award; Randy Adams '76, Special Achievement Award; Michael E. Ducey '70, Special Achievement Award; Arthur **B. Fulton '51**, Special Achievement Award; Susan E. Wiley '86, Community Service Award; Thomas Croghan '61, posthumously, Hall of Fame Award; and Guido Ricevuto, Honorary Alumnus Award.

Visit www.otterbein.edu/alumni to read more about this year's winners and to submit a 2012 nomination.

Arthur Fulton '51, Special Achievement Award Mike Ducey '70, Special Achievement Award

Susan Wiley '86 **Community Service Award** 

accepting posthumous Hall of Fame Award for her late husband, Thomas Croghan '61.

# WHO WILL YOU HELP THIS YEAR?

100 percent of your contribution to the Otterbein Annual Fund goes toward helping:

# **Students**

Your contribution helps us offer scholarships and tuition assistance to 90 percent of Otterbein students. If not for you, they might not be here.

# **Faculty**

Classrooms, computers, books and beyond — the tools our educators use every day are supported by your donations.

# The World

A gift to the Annual Fund, in any amount, helps Otterbein send the next generation into the workforce with ambition, intelligence, and maturity.

#### SIMPLY PUT. YOUR GIFT TO THE ANNUAL FUND HELPS ALL OF US ACHIEVE GREATNESS.

To give right now, please use the enclosed envelope, or visit www.otterbein.edu/makeagift.
