EXTERNAL GRANT AWARDS – Office of Sponsored Programs

Otterbein faculty and administrators have received grants totaling **\$448,780** since April 1, 2015. Ranging widely from research to academic studies to community education, these grants support the mission of Otterbein, enhance faculty achievement and student learning, and strengthen social justice in the central Ohio community.

JENNIFER BENNETT, Associate Professor, Biology and Earth Science
American Society for Biochemistry and Molecular Biology (\$1,000) on behalf of Morgan Stark for the ASBMB Undergraduate Research Award.

SUSAN CONSTABLE, Associate Professor, Education
U.S. Department of Education (\$368,126) to fund the fourth year of the “Central Ohio English Learner Education Collaboration.” There is one more year of funding expected for this grant. The Central Ohio English Learner Education Collaborative (COELEC) unites key central Ohio community organizations, K-12 schools and Otterbein University to provide effective programs to enrich the lives of English Learners through education. COELEC has three major goals: To better prepare 90 current classroom teachers, especially those who teach grades 6 through 12, to provide quality instructional support to English Language Learners; to better prepare all Otterbein teacher education students to support English Language Learners in K-12 classrooms; and to provide opportunities through financial support for 30 local English Language Learners to earn a paraprofessional or teaching license.

BRIAN GARRETT, NTT Assistant Professor, Nursing/
Director, Nurse Anesthesia Program
Health Resources and Services Administration (\$19,135) to fund Otterbein’s “Nurse Anesthetist Traineeship” program. The purpose of this project is to increase the numbers of certified registered nurse anesthetists (CRNAs) in central Ohio and rural Appalachia. Before this program began at Otterbein in 2010, there had not been a nurse anesthesia program in Central Ohio since 1987. This award will be used to 1) fund graduate nurse anesthesia students past their first 12 months of study, and 2) financially support minority and underprivileged nurse anesthesia students past their first 12 months of study.

JANICE GLOWSKI, Director, Frank Museum and Gallery
Ohio Arts Council (\$3,436) for *An Island Apart: Cuban Artists in Exile*, a series of arts-related events that will explore Cuban art and culture, focusing on issues of identity, place-making, and ways of knowing. These will include three public art exhibitions featuring work by twelve prominent, exiled Cuban artists including Ohio resident Juan-Sí Gonzalez, videos from internationally renowned artist and educator Coco Fusco, and an artist-community collaborative artwork led by Artist-in-Residence Juan-Sí Gonzalez.

WENDY R. SHERMAN-HECKLER, Associate Vice President for Academic Affairs and Dean of University Programs/Professor, Education
Martha Holden Jennings Foundation (\$15,500) from the Martha Holden Jennings Foundation for The Jennings Educators Institute. The Jennings Educators Institute is a three-day workshop held over three separate Saturdays in the fall to foster the development of teachers and their work in the classroom. Each ½ day workshop features networking, discussion, and a keynote speaker who is well-respected and well-known among educators in Ohio. While the Jennings Educators Institute is held every year in Ohio, it travels to a different part of the state each year. A well-respected University in the area hosts the event, offering continuing education credits for teachers and the potential for graduate credit. The three Saturday workshops will be held from 8:00am – 12:00pm on September 12, October 10, and November 14, 2015. Attendance at all three workshops is required to become a Jennings Scholar.

NATHANIEL TAGG, Associate Professor, Physics

National Science Foundation (\$36,584) to fund "RUI: NEUTRINO EXPERIMENTS FY14-15." This award, which totaled \$137,006, is the third year of six in which Dr. Tagg has received funding for the project. Dr. Tagg and two undergraduate researchers work at Otterbein and at Fermilab in Chicago, IL to study the MINOS+, MINERvA and MicroBooNE experiments.
