This Project is brought to you for free and open access by the Student Research & Creative Work at Digital Commons @ Otterbein. It has been accepted for inclusion in Nursing Student Class Projects (Formerly MSN) by an authorized administrator of Digital Commons @ Otterbein. For more information, please contact digitalcommons07@otterbein.edu.
Due to the progressive, debilitating nature, it is estimated that over 100,000 people will be diagnosed with MS each year. An estimated 2.5 million people worldwide have MS, making it the most common disabling neurological disease for young adults in the United States.
