Shuttling from the world of Lord Byron and Jane Austen to the present day, *Arcadia* is best described as a romantic comedy in one sense and a suspenseful mystery in another. While the two settings merely have a room in an English estate in common, they also share the intellectual wit and curiosity of Tom Stoppard (one of modern drama's greatest playwrights) creating an experience you won't soon forget. The scope of this critically acclaimed script is large indeed, tackling the certainty of science, the nature of the universe, and the unpredictability of love. This Central Ohio premiere speaks to everyone's hopes and desires.
